

HOMEOWNERS' RESPONSIBILITIES

- *Homeowner* will apply for connection with payment of \$3000.00 This includes installation of the grinder pump, running 50 ft of line from main line to grinder pump and setting the electrical panel. NOTE: lines that exceed 50 ft will be paid by the homeowner at \$24/sq ft.
- *Homeowner* hires a contractor to connect the plumbing from the grinder pump to the house sewer and electrical from the control panel to the house panel. This may require separate contractors, although there are some that do both. Contractors should include trench work, as well. Once work is completed an inspection is required. Inspection will be done by Bureau Veritas @ 570-836-7196 or Ty Dodge, Inspector @ 570-228-6569. A copy of the inspection certificate will be provided to the Authority.
- *Homeowner* shall decommission their septic tank by engaging a tank pumping company to pump out the tank and filled with stone or other suitable material. A verification form must be completed and provided to the Authority by the contractor upon completion. (Forms can be obtained by the Authority)
NOTE: These homeowner requirements and payment are not due until the wastewater treatment plant is completed and operating.

Call 570-836-0514 if you have any other questions & please check our website for updates with the Project.

Thank you for your continued cooperation
